There are other issues w Steve's IA. If you want more details we should do on a call; this is too hard via email.

so i gather from this we have 2 IAs with BOR, one for removal activities and one for technical assistance that Steve has. Seems like this give us ample options.

Currently the IA is specific for RV and RS activities and the funding is all under the RV PRC. We cannot use Remedial \$\$ for Removal activities. If we put remedial money on the IA we will have to call it Technical Assistance which is fine but we'll have to amend the IA SOW to include Technical Assistance. Because of the scrutiny this will be under the biggest concern is that we have continuity in the activity codes we're using and that they are consistent with the field work.

La Plata County will be coming in for a Cooperative Agreement for long term monitoring and that would be one area we can use remedial funds. Also there is some Technical Assistance under one of the IAs that Steve Way has I understand they need \$50,000. We can use the remedial money for that too. Robin was told by Dana Stalcup that HQ is working on sending additional funds.

Can't we just put the pipeline funds on the removal IA?

There were no remedial pipeline IAs to fund this. I can do a removal WAF for the existing removal IA to fund it and have Duc sign it Monday. There is money and appropriate work scope to cover it up to \$47K at the moment.

I think we used remedial pipeline funds to do the investigation. Not sure of status.

Apparently Dana S. is telling the BOR that they cannot use the funds to perform work they came down to do on August 14, but that was not what they did because the event had occurred. They apparently need

GK – Release: tech support (\$ 50) through December – construction safety support, engineering review of plans

GK – Release Technical Review / Independent (\$125K) - HQ
